Yes, I saw the email. The profile for D018 is for South Tank 2 and North Tank 9/10 Comp. I will add the metals data and send it back to you. The D002 profile we completed the other day was for South Tank 7. I have an email into Clean Harbors about the sample review for North Tank 7. South Tank 8 and OT 4 and OT 5 will become non-hazardous once I send Lonestar this lab report. That leaves us with South Tank 1/3/6 which we are splitting up. I will call EQ to see how their review is going for South Tank 3 and we were giving some thought to North Tank 8. I will do my best to see what I can get done for next week.

Beth:

What you sent me is already signed but it shows STank2, and STank9/10 under Lab Analysis under my signature. I don't think this is correct based upon the email you sent me. What do you want me to do? I am ok with you completing this and including the additional data as warranted but you need to send me the fianl so that I can put it in my records.

Also, did you see my forward email from the EPA Houston Lab?

Thanks

Subject: D018 Profile

Gary,

Attached is the D018 profile. I still need to enter the metals information. If you are comfortable signing and letting me do that tomorrow I can keep this going. Otherwise I'm going to need to email this once I've had time to print the metals data off and enter the information. Sorry been a crazy day.

Thanks,

Beth Crawford
